

## **Adjustable and Detachable Binding Device**

### **Abstract of the Disclosure**

An adjustable and detachable binding device includes an elongated binding member, a plurality of locking holders spacedly and integrally formed along a tail portion of the binding member, and a loop locker integrally formed at a head portion of the binding member to detachably engage with one of the locking holders to form a binding loop of the binding member for fittingly binding up an object, wherein the loop locker is shaped and sized that enables the loop locker to be detachably engaged with the respective locking holder, so as to adjust a diameter of the binding loop of the binding member with respect to the object.
